PROFILE

M.Sc. Artificial Intelligence student at FAU Erlangen–Nürnberg with hands-on experience integrating **GPT/LLM APIs** into full-stack applications and building **Python data pipelines**. Strong in **Python, SQL, and PostgreSQL**, with applied work in **data engineering, machine learning (PyTorch), and API/UI integration** for LLM-based tools. Reliable, analytical, and team-oriented. Seeking a working-student role supporting **digitalization, data processing, and AI integration**.

EDUCATION

M.Sc. Artificial Intelligence — FAU Erlangen–Nürnberg

Apr 2023 – Present

Erlangen–Nürnberg, Germany

- Relevant coursework: Machine Learning, Artificial Intelligence, Data Science, Business Intelligence, Advanced Programming Techniques, HCI.

B.E. Computer Engineering — Gujarat Technological University (GTU)

Jul 2018 – Apr 2022

Ahmedabad, India — GPA 7.76 / 10.0

- Coursework: Data Structures, Algorithms, Database Systems, OOP, Computer Networks, IT Security, AI/ML, Software Engineering.

PROJECTS

EarlyApply — AI Job-Matching Platform

2025 – Present

Python, FastAPI, PostgreSQL, Anthropic Claude API, Next.js, React, TypeScript, Playwright

- Built a full-stack platform integrating the **Claude GPT/LLM API** to parse CVs into structured data and score candidate–job fit.
- Engineered a **FastAPI + PostgreSQL/SQLAlchemy** backend and a **data-engineering pipeline (ETL)** crawling 12+ job-board/ATS sources.
- Developed a Next.js/React/TypeScript UI with automated email and Telegram notifications; maintained technical documentation throughout.

Few-Shot Out-of-Distribution Detection with Prompt Learning

2023

Python, PyTorch, CLIP, HuggingFace, CUDA, Linux

- Reproduced a CVPR 2023 study on OOD detection using few-shot prompt learning (CLIP); adapted training from ImageNet-1K to ImageNet-100.
- Achieved AUROC 98.63 on Places via mixed-precision training, prompt templates, and context-length tuning; evaluated on iNaturalist, SUN, and Places.

FedAS — Personalized Federated Learning

2023

Python, PyTorch, NumPy, CIFAR-10/100, CUDA, Linux

- Ran convergence and robustness studies of the FedAS algorithm against FedAvg/FedProx; partitioned non-IID data via Dirichlet distribution.
- Outperformed baselines through Beta tuning and individualized fine-tuning; fixed missing parameters in the original source code.

Chatrio — Real-time Anonymous Chat Platform

2025

React, TypeScript, Node.js, Express, Socket.IO, PWA

- Built full-stack real-time messaging over WebSockets (Socket.IO + Node.js) with interest matching, typing indicators, and image sharing; deployed as a cross-device PWA.

PROFESSIONAL EXPERIENCE

Web Developer — iFLUTTER

May 2022 – May 2023

Surat, India (Remote)

- Built and maintained custom client websites end-to-end — development, testing, and QA — delivering to specification.
- Structured modular, maintainable codebases and kept technical documentation current across multiple projects.
- Diagnosed and resolved production issues; optimized site performance and load behaviour.

Backend Intern (Laravel) — Spider Technology

Jan 2022 – Apr 2022

Surat, India (Remote)

- Developed backend logic for a sales-automation system in PHP/Laravel.
- Integrated **REST APIs** to automate data synchronization and workflows.
- Optimized **MySQL** schema and queries, improving data-structure efficiency and query performance.

TECHNICAL SKILLS

Core (job-relevant):	Python, SQL, PostgreSQL, LLM/GPT API integration (Anthropic Claude), Data Engineering / ETL, REST APIs
Languages:	Python, SQL, TypeScript, JavaScript, C, C++, Java
ML / Data:	PyTorch, NumPy, CLIP, HuggingFace, Mixed-Precision Training, Data Pipelines
Frameworks / Tools:	FastAPI, SQLAlchemy, React, Next.js, Node.js, Express, Docker, Git, Linux/Shell, Playwright, WebSockets
Databases:	PostgreSQL, MySQL, MongoDB

LANGUAGES

English — B2 (working proficiency, written & spoken) | **German** — A2, actively progressing toward B1/B2 via an ongoing course
